New Product Release

Crimpfox 4-in-1 tool does four jobs

Cut, strip, twist, and crimps wires with a single tool

Phoenix Contact's newest addition to the TOOL fox product line offers an all-in-one solution for cutting, stripping, twisting, and crimping. The Crimpfox 4-in-1 crimping pliers is a multifunctional tool for processing conductors and ferrules from 20-14 AWG, with minimal adjustment required. This tool will save you time and money!

The Crimpfox 4-in-1 will strip a wire, twist the loose strands caused by the stripping, then crimp a ferrule with a four-stage pressure lock system. The complete process takes less than a minute, using strips of 50 ferrules in an interchangeable magazine system. The tool is balanced, compact, and comfortable. It is made of a strong, durable GF50 plastic and annealed metal and displays a pictogram for easy operating instructions. The Crimpfox 4-in-1 can also be purchased in a set that includes two additional magazines, for easy AWG changeover, packaged in a small handy carrying case
